

Geological sample:
3D reconstruction of the
internal microstructure.
Volume rendering with
color map of local
pore sizes

SKYSCAN 1275 Fast, Automated Desk-Top Micro-CT

NEW

Free QR-code readers are available
on the AppStore or Google play.

- Highly automated system allows push-button operation with a preselected sequence of scanning, reconstruction, volume rendering and 3D morphological analysis
- X-ray energies 20-100kV, <4µm resolution, 80 sec shortest scan time
- Large field of view up to 96mm diameter and 120 mm height
- Fast GPU-accelerated 3D reconstruction
- Supplied with programs for 2D/3D image analysis and realistic 3D visualization by surface / volume rendering, data export and volume rendering on mobiles
- At the end of a scan, the scanner can send you an e-mail with a direct link to results
